

Kent County Health Department Vaccine Clinics Week of February 22-26

The Kent County Health Department did not receive the quantity of vaccine that was requested for the week. All doses that have been allocated will be used to complete the vaccination series for those needing a second dose. Therefore, there will not be a PUBLIC CLINIC for those seeking their first dose next week.

We look forward to adding new public clinics in the weeks ahead and thank you for your continued patience and understanding.
